Parents fed up with struggling
to get to the school during opening hours?

Reduce queueing time on site and take a step forward to

n Pay

Order and pay for cafeteria services and snack shop products fast and securely, with a few clicks and a contactless card!

n Pay is a fully web based solution accessible from your home computer or on your mobile device with a browser. Creating an account is simple: register with your e-mail address and pick a password. Getting started takes only a few clicks:

**log in and link your kids to your account
and begin placing orders immediately!**

You can top up your card online 3 ways:

- paying with credit/debit card,
- wire transfer from your home banking system,
- direct debit authorization.

Students, classes or student groups can use their contactless cards on entering the cafeteria with a single tap. Parallel authorization of students' access, meal orders and payment processing increase efficiency and speed up the operation of school cafeterias. Canteen staff can monitor all card events on the fly by using a rugged, durable tablet. From now on, RFID-capable student ID cards and custom made contactless **n Pay** cards replace printed meal tickets and over-the-counter cash payment.

School administrators and accounting are able to create statistics in the blink of an eye: payments and orders can be matched easily by checking the students' unique ID code.

Fast

· No more parents' queueing at school on canteen days
· Save time and create repeating orders from existing orders online
· Parents can view, order or cancel their kids' school meals anytime, anywhere
· Effective and secure meal distribution with cashless cards
· Group check out: use one card for an entire class

Simple

· The **n**Pay system is available 24/7 from anywhere over the Internet, on desktop computers and mobile devices as well
· No need for kids to carry cash to school – bullying for lunch money will be reduced
· Easy monitoring of available menus and meals, online orders and cancellation
· Current technology: modernize your school with contactless **n**Pay cards and student RFID cards, replace printed meal tickets
· Administrative overhead and paperwork will be reduced significantly
· Durable, splash- and dust resistant tablets for canteen staff to verify students' order and payment status

Reliable and secure

· No information stored on the card, just a unique ID. We collect all personal and transaction data in the server database
· Parents can follow the entire process of ordering and billing online, step by step
· Reliable, up to date order information and status of payments and dues
· Payments and orders can be matched squarely assigned to students' ID numbers
· Up to date statistics for schools on catering facts, service efficiency and profitability
· Offline mode available in case of internet connection failures

A piece of cake for everyone

For Parents

· Order meals conveniently from home or on your mobile device
· Track your orders, cancellations, billing and have maximum control over what your children eat at school
· Automatized overpayment management: **n Pay** credits all prepaid but cancelled items towards the next month
· Senior students can have their own accounts and manage orders on their own
· Specify allergy and food intolerance settings and make informed choices through flexible and fully customized menus
· Take advantage of personal and normative meal subsidies and transparent pricing

For Schools

· Better school services for everyone
· Intelligent matching of orders and payments
· Organize students into classes and study groups to speed up operation of the school's dining facility — group and class cards are available
· Statistics for school administrators, parents and catering companies, easy accounting
· Managing personal- and normative meal subsidies
· Reduce workload for the school office staff
· No need of cash register or point of sale system to run online ordering
· Best replacement for over-the-counter payments in school snack shops
· A hosted solution requiring minimal impact on school's IT

For Canteen Staff

· Speed up service time by using one single card for larger study groups or entire classes with one single card tap
· Contactless and cashless cards, no fumbling with cash or paper based food tickets
· Card reader emits an audible confirmation tone on card taps
· Visual confirmation displayed on a rugged, splash- and dust resistant tablet
· Touchscreen solution sparing considerable amounts of time to prepare nutritious meal for students
· Real-time view of meal collection during service periods

For Catering Companies

· Reliable and up to date order information right out of the system database
· Easy upload and management of the next month's menu into the online n Pay system
· Itemized tracking of financial claims originating from orders
· No more unpaid, incomplete or incorrect orders

For Local Governments

· Error-free accounting with local catering companies
· A secure, state-of-the-art cashless system to save money
· Faster and flawless catering management through contactless cards
· Helps prevent excess usage and abuse
· Leading edge solution reducing time wasting paperwork
· Contactless cards help getting rid of food ticket forging and other misuses
· Less portions of security reserves needed — ordered and consumed food quantities are equal

Snack shop (coming soon)

- · Students can buy any goods in the school's snack shop by a single card tap
- · Parents control the snack shop budget on separate sub-account
- · Surplus top-ups are transferable for free between any sub-accounts
- · Restrictions can be set regarding goods or goods-category
- · Overview of snack shop turnover is accessible from a web browser

Access control (coming soon)

- · Turnstiles at the school entrance - opened by a card tap access check
- · Real time follow up of students, teachers and other school staff with detailed log reports
- · Automatic absence and overtime administration
- · Increased personal security for students and teachers
- · E-mail and SMS text notifications for parents on special events like kids entering or leaving school
- · RFID tagging of school properties to avoid property damages

I'll have it.
